Overview

The 2016 Dodge Charger SRT Hellcat is a true 2 door coupe with muscle car Performance. This is what the Hellcat Charger is all about. Producing a massive 707 HP (over 500 KW) with its unique 2 door style and sharp aero dynamic appearance. It has many differences including the hood (bonnet), front clip, spoiler, wheels and Hellcat badging. This is a powerful vehicle that has the feeling of a luxury car. All the hellcats have two special keys – the red one unleashes all the power and the second is to limit the power. Don't kid yourself, these are huge performance machine out performing many high end Italian vehicles.

Dodge's own web site states – “the most powerful muscle car ever,” and at 707 hp and 650 lb-ft it's hard to disagree. Dodge even put a 200 mph speedometer in the dash to show the driver
